

Product Description

LED Candle Filament Bulb

LED candle filament bulb is a modern and energy-efficient lighting solution that combines conventional classic candle-style aesthetics with advanced LED technology. C35 LED filament bulb is designed to mimic appearance of traditional candle light bulbs with slim, flame-shaped glass body that illuminate the warm glow of vintage lighting.

Advantage

- Elegant candle design

Todaybulb's C35 LED filament bulb features elegant candle shape, which is ideal for chandelier and LED string light.

- Energy Efficient

Todaybulb's LED filament bulb C35 consumes significantly less power than that of incandescent bulbs while providing the same brightness.

- Long lifespan

Todaybulb's LED filament bulb C35 holds up to 25,000 hours life time with much lower replacement cost.

- Good heat radiation

Todaybulb's E14 LED filament candle bulb is made by glass material, featuring in fast heat radiation, making it lower light decay and longer service life.

- Various base type

Todaybulb's C35 LED filament bulb usually has base type options:E12, E14, E27, B22.
